<p>Admission Procedure of the International Department of the GSV.</p> <p>The admission procedure (22nd April 2014) of the International Department of the GSV applies to the registration of pupils of the International Department GSV. The procedure can be downloaded from the website. If a child is registered Parents/Guardians will be asked to join the Groningse Schoolvereniging Association as members. For this membership the school fee regulation is applicable. The school fee will be asked of you from the first day your child starts school. All registrations will be processed in the order that they come in. If a maximum number of pupils in a class is reached, pupils will only be placed in consultation with the teacher in question and in observance of the needs of the pupil and available school resources.</p> <p>Definite placement depends on the results of the admission procedure. A definite withdrawal of registration should be sent in writing.</p>	

Dear Parents, Guardians,

It is important to us to explain what is made possible due to the payment of the school fee, which is high quality education, for your children. We would like to inform you about our philosophy regarding the education we offer and the choices that we make.

The world at your feet

Your children are growing up in the 21st Century. From the day that they were born they are world citizens. The world surrounding them is an international community. This community is constantly changing socially, technologically and economically with great speed. We want to prepare your children for a future within this international setting. We want them to find their place in this world in all areas of their lives; in relationships, study, work and society. Everyone has a different background, but everyone is part of this global community.

Five Pillars

To achieve this mission statement we uphold 5 pillars in all that we do:

1 Challenge

We want every pupil to achieve their potential. This means that we, together with each child, make plans to develop his or her unique package of talents. Our children work in their year groups and are challenged at their own level. Our teachers differentiate in instruction and educational materials per child. They keep track of each child's progress. We also have additional staff and materials to meet the needs of children who need extra support or challenge.

2 The best facilities

Together with you we invest in the best facilities for our children. These facilities are possible due to the school fee. We invest in teachers, because we believe that small year groups and subject teachers add many pluses to the quality of education. We aim for small class numbers. Next to this we have experienced specialist teachers for music, physical education and Dutch and Spanish. There is attention for Science and Technology and Cultural Education in all year groups. The ICT programme teaches children how to program.

3 Future proof

We teach children the skills they need in the 21st century. The world changes rapidly. We train our children for jobs which don't exist yet, but we have a vision regarding the skills they need to live and work in this century. We identify six vital skills which we address in our educational provision:

- Collaboration
- Creative thinking
- Initiative
- Research
- Information analysis
- Adaptability

4 International

We are a school where cultures from all over the world meet each other in the international and the bilingual departments. We provide our children with a genuinely international learning environment. We celebrate our diversity and diverse cultural backgrounds with shared activities like the language of the month and international lunches. Children in the bilingual department and the Gifted department are taught in English for 30%, These lessons are mainly taught by (near) native speakers. In the international department all lessons are taught in English, with the addition of two Dutch lessons of one hour each week.

5 A learning school

We reflect upon and improve our educational provision continuously by investing in the expertise of our teachers. Our staff improve, innovate and work on the sustainability of our educational provision on a daily basis. We are ambitious, curious and healthily demanding. We follow our own course and this makes us flexible in a world and time that demands this flexibility.

Differentiated Education and Care

At the GSV we care for the individual potentials and progression of every pupil by thorough and innovative differentiated care and teaching. Evidence that this works can be seen in the school results, but also in the pleasure children and their parents have in being part of our school.

Your contribution

The five pillars and the provision of differentiated education and care make a demand on human resources and means. The support we have from the government is not sufficient. The school fee provides additional resources, subject teachers, care staff and near native speakers to support and give the attention which your child deserves. Most of all it makes the unique educational programme which we have in school possible.
